Curriculum Vitae

Gabbo was born in Mexico City, in one of the most traditional and iconic neighborhoods of the popular sector. His family has been the inspiration and foundation of his journey. His father, a natural leader, would do anything for his loved ones. His mother, a beacon of joy, could lift anyone's spirits just by being present. His brother, one of the most loyal and affectionate people he knows.

From a young age, Gabbo understood that learning from others and teaching them is a powerful way to build a strong community where individual well-being reflects collective well-being. TAOL Project is the canvas upon which he maps out each experience, challenge, and lesson that has guided and will continue to drive him through a diverse and effective range of disciplines and practices.

With a strictly mathematical and financial background, but always curious about the vast array of human knowledge, Gabbo began exploring various fields of scientific thought and spiritual practices, including psychology, improvisation, neuroscience, meditation, yoga, and more. Thus, he developed a unique methodology with two fundamental pillars:

A profound understanding of financial and mathematical concepts.
The development of a deep personal transformation discipline.
TAOL Project is the result of a thorough analysis of the human psyche and the various ways to achieve abundance in life. These teachings are shared through workshops, courses, and personal consultations aimed at building a successful community based on a single principle: where the sun shines for everyone.
